WASTE, GARBAGE, RECYCLABLE

Everything for the garbage can – but for which one?

ENGL.

HANAU? KEEP IT CLEAN!

Dear Hanau residents,

We all want a clean city, a home worth living in and a healthy planet. Let's take responsibility for this together and start at our own front door or at our own trash cans.

It's best to try to avoid trash where you can. Also take advantage of the growing supply of unpackaged foods and the many second-hand opportunities, e.g. for clothing or electronic devices.

By the way, many things that end up in the garbage can are not waste, but valuable materials that can be recycled. To do this, it is important to separate them. This flyer shows you exactly what belongs in which garbage can.

Please join us and separate your waste – for the environment, for Hanau and for our future.

Sincerely

Thomas Morlock
City Council
Stadt Hanau

Questions on all topics related to waste and disposal?

Waste consulting:
06181 295-566

WASTE PAPER

WHAT GOES IN THE BLUE GARBAGE CAN?

- Waste and packaging made of paper, cardboard or carton
- Emptying blue garbage can every four weeks
- Save space by tearing and folding
- No food residues adhering
- Cardboard boxes etc. placed next to the garbage can will not be taken away
- Use public paper containers for short-term additional demand

SALES PACKAGING

WHAT GOES IN THE YELLOW GARBAGE CAN?

- Empty packaging made of aluminum, tinplate, plastics
- Emptying yellow garbage can every four weeks
- Empty the remaining packaging, rinsing is not necessary. Separate all components, do not stack them into each other
- Use yellow bags for short-term additional demand

BIO WASTE

WHAT GOES INTO THE BROWN GARBAGE CAN?

- Compostable organic waste
- Emptying brown garbage can every two weeks
- Bind moisture in the garbage can using newspaper, kitchen paper or paper bio bags
- No plastic bags in the organic waste garbage can – not even „compostable“ ones!

RESIDUAL WASTE

WHAT GOES IN THE BLACK GARBAGE CAN?

- Waste that cannot be sorted into the other three garbage cans
- Emptying black garbage can weekly or 2-weekly
- Electrical appliances, pollutants and everything for which there is a take-back system do not go into the residual waste garbage can!
